

# Time consuming PBC items are simply automated

## About GHJ

GHJ are based in California with hubs and team members across the US. With over 200 employees and audit team of 55.

## History

GHJ have partnered with Validis for over 8 years. The goal was to extract information directly from the clients' general ledger system, without manual intervention or requests to clients.

## Impact

The immediate impact has been 'huge for both the auditor and the client'.

Looking forward, with tools like Validis, they can have a continuous audit process, accessing uploaded data on a periodic basis. They do that for some of their clients, using it to perform testing and walk-throughs during the year. This helps prevent capacity crunches in busy season.

"Now a great deal of the time consuming PBC items are simply automated."
