

Job Description

| Full Stack Software Engineer

Business Area: Technology
Reporting to: Head of Software Technology
Location: London

Validis are a software service company specialising in providing real time standardized accounting data to help power business processes. Our award-winning smart data pipe extracts, standardizes and analyses small business accounting data via robust APIs, putting it directly in the hands of those that need it so they can do their jobs faster and smarter.

Key responsibilities include:

- Become part of an Agile team to build well tested, secure and reliable code
- Work close to Product Owners, understand requirements and propose technical solutions
- Work with the application support team to resolve issues in line with SLAs
- Work on small change initiatives, delivering high quality product updates
- Assisting with internal and external communication, improving transparency and radiating information

Experience

- 3+ years of industry data/engineering experience
- Successful experience in working in micro-services architecture (REST, JWT, message brokers)
- Extensive knowledge of Java 8-11, Spring Boot, and Hibernate
- Extensive knowledge of Typescript, Angular 4+, DevExtreme
- Knowledge of Azure and native services (SQL Server, Service Bus, Blob Storage, API Gateway, AKS)
- Ability to explain complex scenarios in simple language
- Experience working in an agile delivery model
- Strong problem-solving skills
- Excellent communication skills

Advantageous Attributes

- Degree/Masters in a Software/Data related discipline
- Experience in the Financial or Accounting Services industry strongly preferred
- Experience working with Reactive frameworks (Reactor, Spring WebFlux)

Full Stack Software Engineer

Advantageous Attributes (cont...)

- Experience working with NoSQL databases (MongoDB)
- Experience working with modern message brokers (RabbitMQ, Kafka)
- Experience working with Docker, Kubernetes

Personal Attributes

- A self-starter who has a track record of delivering in an agile environment
- Positive team member who can bring the best out in those around them
- Takes ownership of tickets and sees them through to resolution
- A T-shaped developer who is happy to expand beyond their immediate role to ensure the team hits their goals
- An innovative thinker who can build product features that delight users
- A great communicator who understands that knowledge sharing produces the best results for the team and business

Benefits of working at Validis

- Competitive salary, flexible working from home policy, 25 days holiday, access to company benefits after 3 months
- Application deadline: 21/8/2020
- Job Types: Full-time, Permanent
